

Assignment lab04

Course title: Software Engineering Laboratory
Course code: CSE-3206
Session: july-december 2026

Date of Submission:8/10/2026

Submitted to-

Tanjim Taharat Aurpa

Assist Professor

*Department of Data Science and Engineering,
University of Frontier Technology, Bangladesh*

Rumana Yasmin

Lecturer

*Department of Computer Science and Engineering
Bangladesh University of Professionals
Mirpur Cantonment, Dhaka-1216*

1. Role-Based Access Control

Test Case: Unauthorized Student Access to Notice Creation

Field	Details
Test Case ID	TC-BH-RBAC-1
Test Scenario	Verify that a student cannot access the notice creation function when the function is restricted to authorized users.
Preconditions	1. The student account is active and logged into BatchHub. 2. Students do not have permission to create academic notices. 3. Notice creation is available to authorized academic users.
Test Steps	1. Navigate to the Notice section. 2. Attempt to access the "Create Notice" option. 3. If the option is displayed, attempt to create a notice.
Input Data	User Role: Student Requested Function: Create Notice
Expected Result	System denies access to the notice creation function and displays an appropriate authorization/access-denied message. The student must not be able to create or publish a notice.
Actual Result	To be completed during test execution
Status (Pass / Fail)	To be completed during test execution
Remarks	Validates the invalid equivalence partition where a user attempts to access a function without the required role/permission.

2. Notice Creation & Categorization

Test Case: Valid Notice Category

Field	Details
Test Case ID	TC-BH-NCC-EP-01
Test Scenario	Verify that an authorized user can create a notice using a valid notice category.
Preconditions	1. An authorized academic user is logged into BatchHub. 2. The user has permission to create notices. 3. Notice creation page is accessible.
Test Steps	1. Navigate to the Notice Management page. 2. Click "Create Notice". 3. Enter a valid notice title and description. 4. Select a valid category. 5. Enter a valid target audience. 6. Click "Publish".
Input Data	Title: Mid-Term Examination Schedule Description: Mid-term examination will begin from 15 November. Category: Examination Target Audience: CSE students
Expected Result	The system successfully creates and publishes the notice. The notice is displayed under the selected Examination category and is available to the intended target audience.
Actual Result	To be completed during test execution
Status (Pass / Fail)	To be completed during test execution
Remarks	Validates the valid equivalence partition for notice categories.

3.Search & Filtering

Test Case: Search Using Non-existent Keyword

Field	Details
Test Case ID	TC-BH-SF-EP-01
Test Scenario	Verify that the system handles a search when the entered keyword does not match any available academic information.
Preconditions	1. The user is logged into BatchHub. 2. Search functionality is available. 3. The keyword XYZ9999 does not exist in any accessible course, notice, material, or project.
Test Steps	1. Navigate to the Search page. 2. Enter XYZ9999 in the search field. 3. Click the Search button. 4. Observe the search results.
Input Data	Search Keyword: XYZ9999
Expected Result	The system returns no matching results and displays an appropriate message such as " No results found. " The system should not display unrelated information.
Actual Result	To be completed during test execution
Status (Pass / Fail)	To be completed during test execution
Remarks	Validates the invalid equivalence partition for keyword search where the keyword does not correspond to available academic information.
